

A MASTERFUL SUCCESS STORY

Konecranes GmbH Hamburg

KONECRANES®

CUSTOM-FIT FIRE PROTECTION FOR CRANE SYSTEMS

Konecranes is one of the global market leaders in Lifting Businesses and supplies manufacturing and process industries, shipyards and ports with innovative lifting solutions. The group employs around 16,500 people in approximately 50 countries.

An Airbus crane system has now been equipped with AMFE miniature fire extinguishers to protect its electrical cabinets. The solution cost-effectively reduces downtime after a fire. Only directly affected parts need replacement; complete cabinets do not have to be replaced, avoiding months of operational downtime.

Electrical cabinets are often the Achilles' heel of fire protection in production and logistics facilities: around one third of industrial fires are caused by faulty electrical systems.

THE AMFE ENSURES SAFETY - effectively preventing, among other things:

- spread of fire (risk to people)
- equipment and conveyor downtime
- production and shipping outages
- loss of goods
- extinguishing residue

THE AMFE - available at www.meister-automation.shop
