

A MASTERFUL SUCCESS STORY

VdS-certified AMFE at OeTTINGER Brauerei GmbH

THE ORIGINAL - IN FIRE PROTECTION TOO

Original OeTTINGER is one of Germany's largest beerbrands. OeTTINGER Brauerei GmbH ranks among the world's 25 most influential breweries. Its consistently strong performance and long-standing product quality have earned OeTTINGER more than 300 national and international awards since 1980 alone.

The food industry presents specific fire protection challenges. VdS Loss Prevention has developed a dedicated protection concept for breweries. To address this particular risk, OeTTINGER's Braunschweig brewery has equipped its machinery with the AMFE miniature fire extinguishing unit.

This reduces the fire risk around flammable materials and hot surfaces. The 3M Novec extinguishing agent used in the AMFEs meets food-industry requirements. It has seven times the extinguishing capacity of CO₂, leaves no residue and is harmless to people - ideal for a brewery.

THE AMFE ENSURES SAFETY - effectively preventing, among other things:

- spread of fire (risk to people)
- equipment and conveyor downtime
- production and shipping outages
- loss of goods
- extinguishing residue - especially critical in food production

THE AMFE - available at www.meister-automation.shop
