

A MASTERFUL SUCCESS STORY

More than 200 AMFEs in use at Liebherr-Logistics GmbH

LIEBHERR

WE ARE THERE BEFORE THINGS GET HOT

As one of the world's largest construction equipment manufacturers, LIEBHERR gives safety the highest priority. Its highly automated logistics centre, equipped with more than 200 electrical cabinets, supplies spare parts to customers worldwide.

Using our automatic AMFE miniature fire extinguishing unit and the associated custom multialert® solution for simultaneous activation, we provided LIEBHERR with a high-quality, ready-to-use installation in record time - without interrupting operations.

In the event of a fire, the integrated miniature extinguishing unit activates automatically and immediately alerts the higher-level fire alarm system. This prevents fire from spreading and protects employees at all times.

We are pleased to help ensure uninterrupted global spare-parts supply and look forward to continuing our collaboration.

THE AMFE ENSURES SAFETY - effectively preventing, among other things:

- spread of fire (risk to people)
- equipment and conveyor downtime
- production and shipping outages
- loss of goods
- inability to deliver (worldwide in LIEBHERR's case)

THE AMFE - available at www.meister-automation.shop
